## CoRDEES Zoom-In: Video sheds light on the project

See on UIA  
website

UIA Expert Juan Ramon de las Cuevas and the CoRDEES team have produced a video to explain the main elements of this Energy transition project.

In the first Zoom-In produced for the CoRDEES project, we learn more about the key objectives and elements of this innovative project being implemented in the city of Paris.

This video provides testimonies from key project stakeholders and guides us through one of the first buildings part of the CoRDEES project. The Zoom-In also addresses data collection and management as well as energy governance and stakeholders engagement.

The UIA will publish a collection of Zoom-In's from its funded projects annually in a variety of formats including: articles, interviews, videos or infographics. Zoom-Ins are an in-depth look into a specific part of the project allowing us to deepen the knowledge generated by the project concerning the solutions designed and implemented. It provides further information on how to overcome the main challenges related to the experimentation of innovative projects in a real urban setting.
