## TUPPAC UIA Expert Journal – Learn how the use of autonomous collective transport will transform urban planning

See on UIA  
website 

UIA Expert, Dr. Anna Pernestål, gives a first look on how the project is being implemented

It's been some months since the TUPPAC project started its implementation and many activities have been carried out. The project has begun to produce knowledge stemming from the implementation of its innovative solution. You can now read the first of a series of journals following the TUPPAC (Transforming Urban Planning Providing Autonomous Collective mobility) project implementation process. In this first edition, find out about the EU, national and local policy. As well as these main elements:

- General context and technical development
- The main implementation challenges including technical and legislative readiness
- Key learning points

Get to know better what Albertslund is doing on the topic in this UIA Expert journal!
