

WebEx Plugins: installation

In order to use the Uia videoconference “WebEx”, a plug-in **must** be installed on your computer. It is advised to test WebEx prior to your first online session:

1. Open your **web browser** (preferably *Internet Explorer, Firefox*. **Edge is not supported**).
2. Go to <https://uia-initiative.webex.com> and click on **Webex Events** link

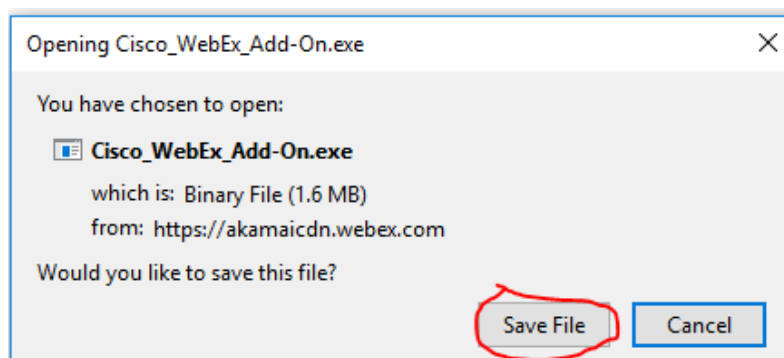

3. On the left of the navigation bar, go to **Set up, Webex Events** and click on the **Setup** button
The system will check whether your computer has already the necessary plugins.

4. If you receive any request to download and install plugins, **accept** and **follow the installation steps**.

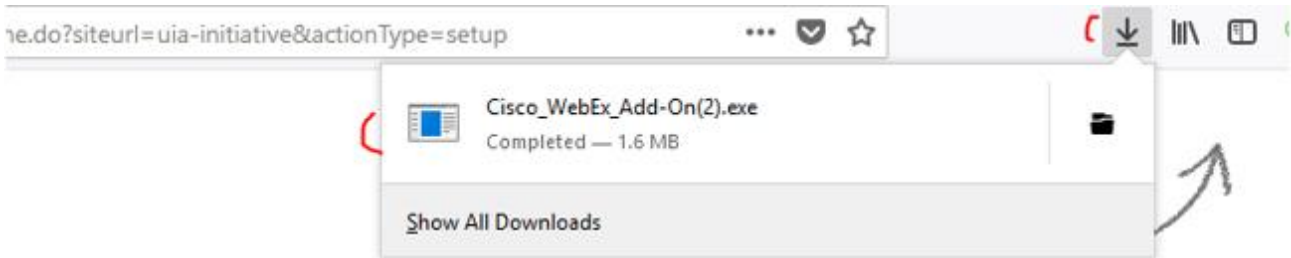

4.1: If you use Firefox :

- Click on the Save File button

The Urban Lab of Europe!

- At the top right click on the **arrow** and install the plugin “Cisco_Webex_Add-On.exe”

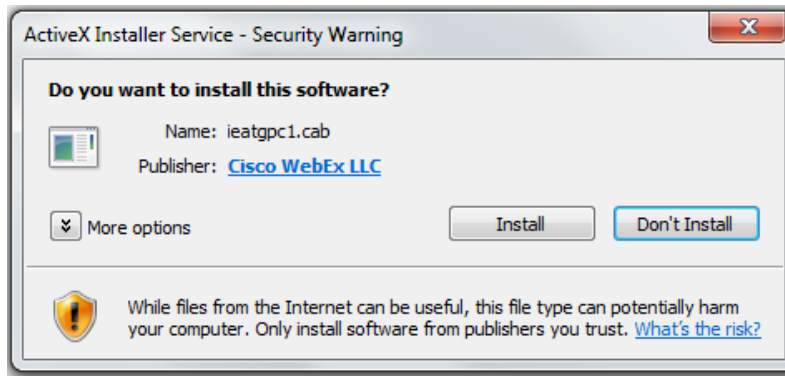

Save and open **Cisco_WebEx_Add-on.exe** after it has finished downloading.
If it does not start automatically, [go here](#) to download it again.

4.2: if you use Internet Explorer :

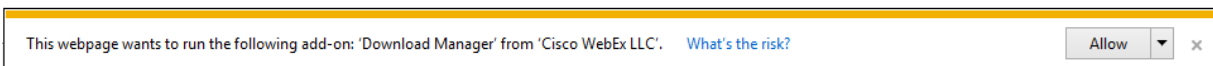

- Click on **Install**

- Click again on **Install**

- Finally click on **Allow**

5. You will know you are successful when you receive the **Setup complete** window.

Setup is Complete

You have successfully set up Meeting Center on this computer.
